PROJECTS

ThreadScape – E-commerce Management System (EMS) ⬈   February 25 – March 25
Frameworks: MERN Stack, Tailwind CSS, Redux, Stripe, Framer-motion, Axios

- Integrated secure payment processing into the fashion-focused E-commerce Management System (EMS), decreasing fraudulent transactions by 15% and solidifying consumer trust in the platform.
- Developed key features including Admin Dashboard, product catalog management, an intuitive user interface, and 100% secure payment processing to provide a seamless and secure shopping experience for fashion products.

Chatteristic – Real-Time Chat App ⬈   March 24 – April 24
Frameworks: MongoDB, Express, React, Node.js, React Query, Zustand, Cloudinary, Tailwind CSS, Daisy UI

- Built a real-time messaging platform enabling users to instantly communicate & share multimedia content, ensuring 99% message delivery reliability.
- Integrated AI-driven features that leverage natural language processing (NLP) algorithms to ensure quick, dynamic responses with an average time of less than 5s, enhancing user engagement and satisfaction.

Weather Vista – API based Weather Application ⬈   August 23
Technologies: HTML5, CSS3, JavaScript and OpenWeatherAPI

- Created a live weather application that provides real-time weather updates for any given location worldwide. Allowing users to receive response like temperature, humidity, wind speed, etc. within 1 second.
- Utilized JavaScript to handle user input and update the UI, efficiently under 500ms, allowing for a seamless and interactive experience.

SKILLS SUMMARY

- **Programming Languages –** Python, SQL, JavaScript, C
- **Frontend Web Development –** HTML, CSS, React, Tailwind CSS
- **Backend Web Development –** MongoDB, Postgres, Express.js, Node.js, JWT
- **State and API Management –** Redux-Toolkit, Context API, Zustand, Axios, React Query
- **Development Tools –** Postman, Vercel, REST APIs, MongoDB Atlas, NPM, VS Code
- **Version Control System –** Git and GitHub

EXPERIENCE

Tevatron Technologies Pvt. Ltd. | [Certificate]   Remote
Training Intern   February 23 – March 23

- A **Restaurant Billing System** project under experienced mentor in a team of 4 using programming language **Python**.
- Received appraisal on the basis of the hard work and efforts on the project in order to understand the core functionalities better and successfully reducing time on billing and payment services by 50%.

EDUCATION

Ewing Christian College   **Prayagraj**
Bachelor of Science in Computer Application (GPA: 7.1)   August 18 – June 21
Maharishi Vidya Mandir Sr. Sec. School   **Fatehpur**
Intermediate (Percentage: 85.9%)   April 17 – March 18

CERTIFICATES

JavaScript Programming – Euan | [Certificate]   January 25
- Acquired proficiency in JavaScript fundamentals, including variables, functions, arrays, and DOM manipulation, enhancing web development skills.

Git for Beginners – Thomas Claudius Huber | [Certificate]   December 24
- Developed a solid understanding of Git version control, including repository management, branching, and collaboration workflows to streamline software development.
