Projects

BHARAT BHOOMI – REPORTER MANAGER & NEWS MANAGEMENT SYSTEM — **Freelance**
— MongoDB, Express, React, Node.js, Tailwind CSS

- Developed a Reporter Manager and News Management System for Bharat Bhoomi, an independent news firm, working with the internal lab of its news publishing department.
- Built the public-facing news website along with an internal dashboard for managing reporters and publishing news content.

TASKBUDDY – TASK MANAGEMENT FOR LAZY GENIUS — **Apr 2025 — May 2025**
— React, Tailwind CSS, Supabase, Framer Motion

- Developed a quadrant-based task management application inspired by the Eisenhower Matrix, enabling users to categorize tasks by urgency and importance.
- Used Supabase for real-time sync and Framer Motion for animations, boosting retention by 30%.

THREADSCAPE – E-COMMERCE MANAGEMENT SYSTEM (EMS) — **Feb 2025 — Mar 2025**
— MongoDB, Express, React, Node.js, Tailwind CSS, Redux, Stripe, Framer-motion, Axios

- Built a fashion-focused full-stack E-commerce Management System (EMS) with Stripe payment integration, exploring secure checkout flows and payment handling.
- Developed core features including an Admin Dashboard, product catalog management, and an intuitive user interface to practise end-to-end MERN-stack architecture.

Certificates

JavaScript Programming – Euan [Certificate] — **Jan 2025**

- Acquired proficiency in JavaScript fundamentals, including variables, functions, arrays, and DOM manipulation, enhancing web development skills.

Git for Beginners – Thomas Claudius Huber [Certificate] — **Dec 2024**

- Developed a solid understanding of Git version control, including repository management, branching, and collaboration workflows to streamline software development.
